Response to Arguments

Applicant's arguments filed 07-23-02 have been fully considered but they are not persuasive. In view of Applicant's remarks the rejection over prior art Hama et al. has been removed. The rejection under new matter stands. The declaration from Dr. Patrick has been reviewed and noted in the file. However, new matter, as pointed out in the previous office actions has been added to the application and Applicant has failed to point out line and page, where the basis for this new matter originates in the original disclosure. Note that the original disclosure described the coil as having first and second segments in series, not the three individual portions claimed. Applicant has argued that these new matter inclusions are inherent features, as does Dr. Patrick. However they are not considered inherent. Applicant should note that the coil specifics such as the planar relation of one turn of the coil to another and the spatial and planar locations of one coil portion to another have not been disclosed. How then can a patentable result of a more uniform etching occur without such disclosures. In paragraph 2 on page 4 in the response, Applicant has stated that the Examiner has failed to show that Hama et al. necessarily has a coil having interior, intermediate and peripheral portions so that the density of the magnetic flux on the inner and outer portions of the coil exceeds the flux coupled to the plasma by the intermediate portion. For this reason the rejection was removed and such feature is not inherent. Applicant is saying that this feature in Hama et al. is not inherent and at the same time saying that this feature is inherent (in the instant affidavit by Dr. Patrick). This reasoning is not understood, and is contradictory. The Examiner has been persuaded by Applicant's

Art Unit: 3742

response that the art rejection under Hama et al does not stand and the instant claims are not inherently taught in Hama et al. For this reason and the reasons set forth supra, the rejection under new matter stands and is made final.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
